DOLPHINS HELP SAVE A STRANDED SWIMMER BY ALERTING RESCUE CREW

Dolphins are believed to be incredibly intelligent, and one recent event lends credibility that this may be the case. Just recently, lifeboat crews off the coast of Ireland rescued a missing swimmer who was wearing only swim trunks and had been at sea for nearly 12 hours.

What's most interesting about this is that dolphins played a crucial role in helping rescue the swimmer. The initial search wasn't successful, so another intensive search was begun. Finally, searchers spotted a pod of dolphins which led them to locate and rescue the exhausted swimmer. This person may very well have lost his life if it hadn't been for the dolphins. Doctors surmised that the swimmer would not have survived for another 30 minutes... perfect timing!

TODAY IN HISTORY

1964: The International Swimming Hall of Fame was founded in Fort Lauderdale, Florida.

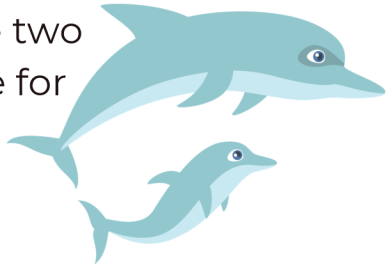

1988: Wayne Gretzky scored his 600th NHL goal.

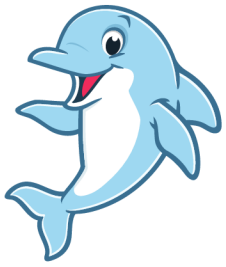

INTERESTING FACT

Dolphins have two stomachs, one for the storage of food and one for digestion.

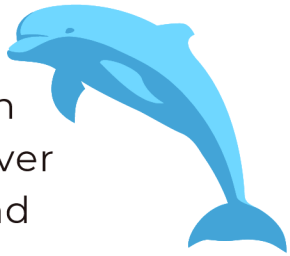

HAPPY-HEARTY-LAUGH

I'd make a joke about dolphins... But I really don't see a porpoise!

DID YOU KNOW?

Dolphins only use their teeth to catch their prey; they never chew their food and swallow it whole.

"Some of the greatest minds on Earth live in the seas."

- ANTHONY DOUGLAS WILLIAM

80-YEAR-OLD EARNS BRAVERY AWARD FOR FIGHTING OFF BEAR

Norman Ruff is an 80-year-old who can brag about fighting off a bear with his bare hands. One summer morning, a black bear came through his kitchen window in the middle of the night. When Norman investigated the noise, the agitated bear saw him and went into attack mode. Norman said the two duked it out for about 20 minutes, with Norman and the bear exchanging blows. Then, as the bear roared, Norman knew he had to give the bear his best shot to protect his family.

In the process, Norman almost lost his thumb when the bear grabbed his hand in his mouth and yanked. Surgery saved his thumb, but he now suffers from nerve damage. The Ontario police presented Norman with a commendation for his incredible bravery and skill that saved two lives that day. Way to go, Norman!

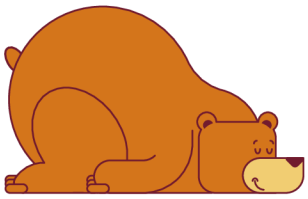

TODAY IN HISTORY

1871: The National Rifle Association was incorporated in the US.

1998: AOL announced the purchase of Netscape for $4.21 billion.

INTERESTING FACT

The heartbeat of a hibernating bear can drop to 8 beats per minute.

HAPPY-HEARTY-LAUGH

What do you call a bear with no teeth?

A gummy bear!

DID YOU KNOW?

Bears have an excellent sense of smell and can smell food, cubs, and even predators from miles away.

"Bravery is being the only one who knows you're afraid."

- FRANKLIN P. JONES

HATCH CHILE PEPPERS HARVESTED IN SPACE

We receive daily reminders that there are no limits to human innovation. This time around, the crew aboard the International Space Station surprised us by growing Hatch chile peppers in space! Their success resulted from the challenging Plant Habitat-04 study, which is regarded as one of the most challenging plant experiments to date.

The ISS crew was able to pull it off, and no doubt their diets will have a whole lot more flavor! These fascinating experiments will inform future crop growth and food supplementation activities for deep space exploration. Congratulations to all involved!

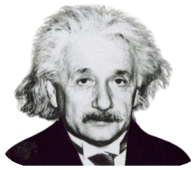

TODAY IN HISTORY

1783: The British evacuate New York City, ending their occupation after the Revolutionary War.

1915: Albert Einstein presented his general theory of relativity.

INTERESTING FACT

The Jalapeño chili gets its name from Jalapa, the capital of the Mexican state of Veracruz.

HAPPY-HEARTY-LAUGH

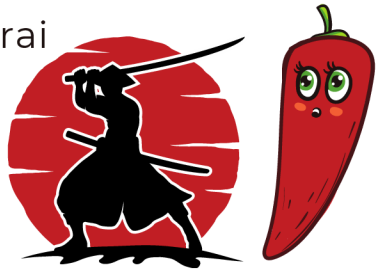

Why was the baby Jalapeño shivering?

It was a little chili!

DID YOU KNOW?

It was a common tradition for Japanese samurai to use chili peppers to reduce fear before battles.

"Innovation: Imagine the future and fill in the gaps."

RESOURCEFUL 9-YEAR-OLD GIRL UNLOCKS FATHER'S PHONE TO SAVE HER FAMILY

Kids these days are so brilliant and capable! This description is especially true for nine-year-old Jayline Brandao. Her family had been without power, so they decided to borrow a generator to power their home. But, unfortunately, they placed the generator inside, which led to carbon monoxide within the house.

Jayline's mom passed out as a result, and her father began screaming for help. But unfortunately, he also lost consciousness. Thankfully, Jayline cleverly unlocked her dad's phone by using his face so she could call for help. Jayline's quick thinking and her ability to remain calm in a crisis ended up saving her family's life!

TODAY IN HISTORY

1789: President George Washington declared the first national U.S. Thanksgiving Day.

1942: "Casablanca" premieres at the Hollywood Theater in New York City.

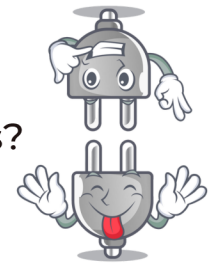

INTERESTING FACT

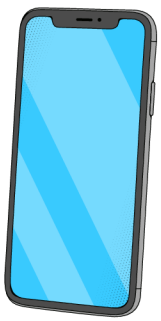

The first-ever mobile phone sold in the US was designed by Martin Cooper and cost roughly $4,000.

HAPPY-HEARTY-LAUGH

Why did no one want the free phone cables?
Because they were free of charge!

DID YOU KNOW?

Modern smartphones have more computing power than the computers used for the Apollo 11 moon landing.

"Ingenuity, plus courage, plus work, equals miracles."

- BOB RICHARDS

HUNDREDS IN BARCELONA NOW BIKING TO SCHOOL THANKS TO 'BIKE-BUS'

Many families in Barcelona have been advocating for bike lanes and safer roads. Thankfully, their efforts are coming to fruition, as every Friday morning, an entire caravan of bikers head towards school or the workplace.

The caravan, dubbed the Bike Bus or "Bicibus," started when five families decided to ride their bikes to school in an attempt to advocate for quieter and safer roads. Eventually, more families joined in, and now hundreds of people have joined in on the popular and awe-inspiring bike ride. The families are hoping their efforts will compel the government to create a school-friendly bike lane that's free of any unnecessary traffic. Good news for bikers' safety and the environment!

TODAY IN HISTORY

1895: Swedish inventor Alfred Nobel donates the majority of his assets to establish the Nobel Prize.

1942: Jimi Hendrix is born in Seattle.

INTERESTING FACT

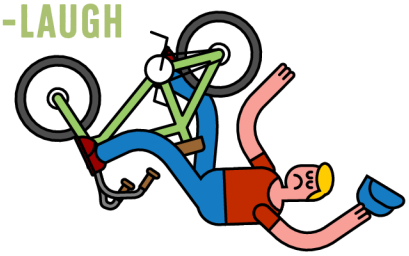

Damien Hirst's Trek Madone, also known as the Butterfly Bike, was auctioned for $500,000 at Sotheby's.

HAPPY-HEARTY-LAUGH

Why did the bike fall?

It was just two tired!

DID YOU KNOW?

The world's longest bike was 135 feet and 10.7 inches long. It was built by the company Santos and the University of South Australia.

"If you can't change it, change your attitude."
